
Introduction and Expectations

Module Objective:

Understand the course objectives, materials, flow, and participant expectations

Course Overview

- Agenda Review
- Methods and Materials
- Training Book
- Learning Techniques

Course Objectives

- Empower Mission staff to improve environmental performance throughout project life cycle
- Establish effective intervention techniques for your involvement throughout the project life cycle
- Integrate compliance and conformance along the value chain
- Create a peer network
- Improve awareness of available resources

Course Outcomes

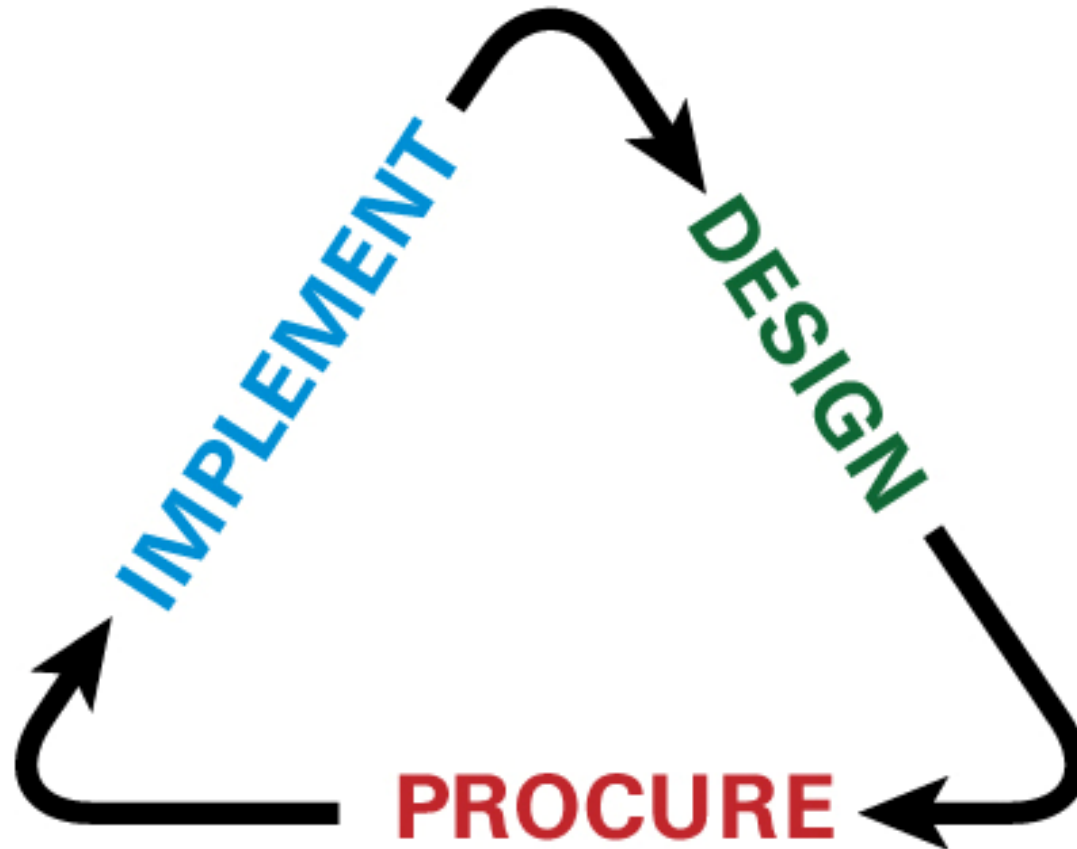

- Day One
 - Integration of USAID pesticide procedures throughout the project life cycle
- Day Two
 - Recognition and documentation of compliance with regulatory and market based pesticide and food safety management system criteria
- Day Three
 - Recognize the opportunities and challenges associated with integrating compliance and conformance systems
- Day Four
 - Application of tools and methods for each element of the project cycle required to achieve regulatory compliance and market conformance

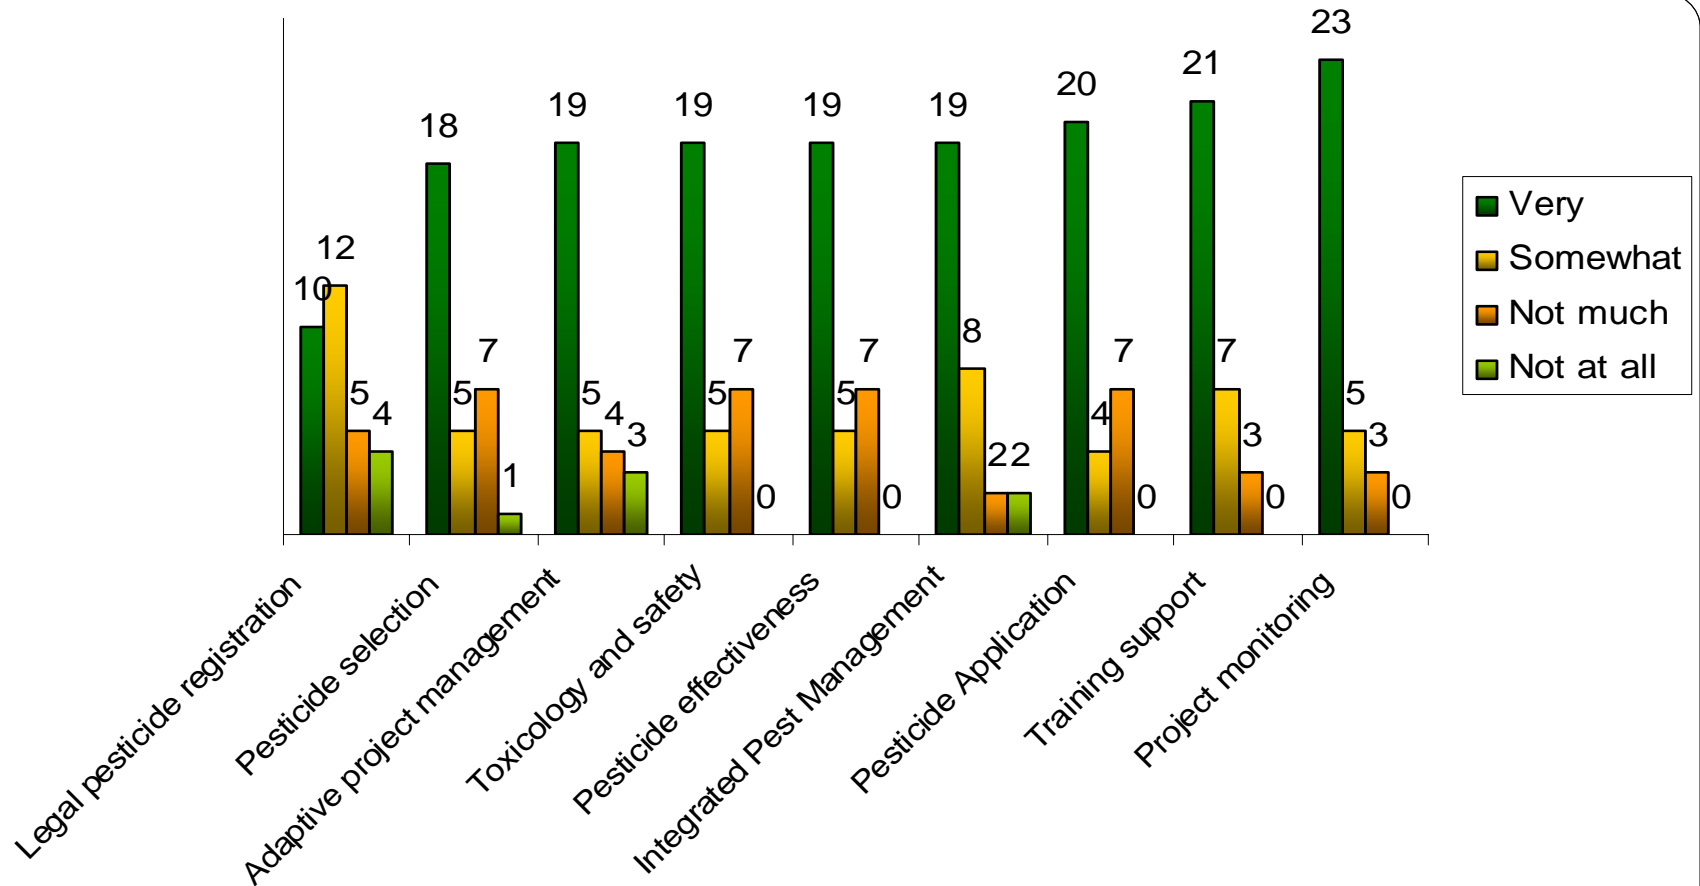

Holistic Integration

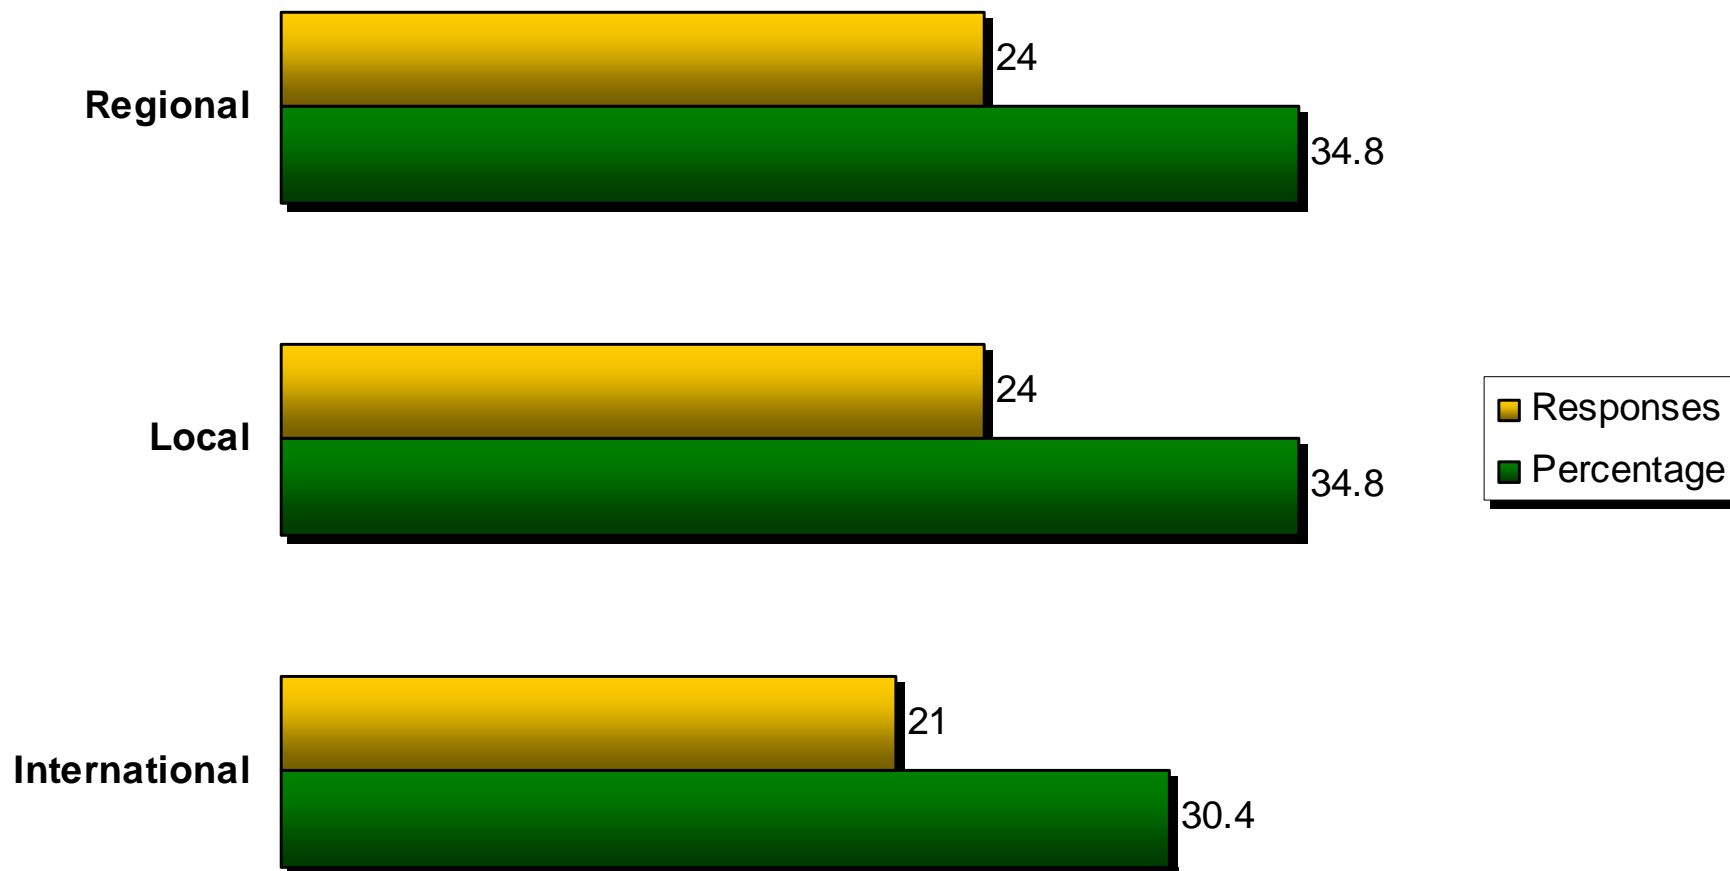

Project Life Cycle

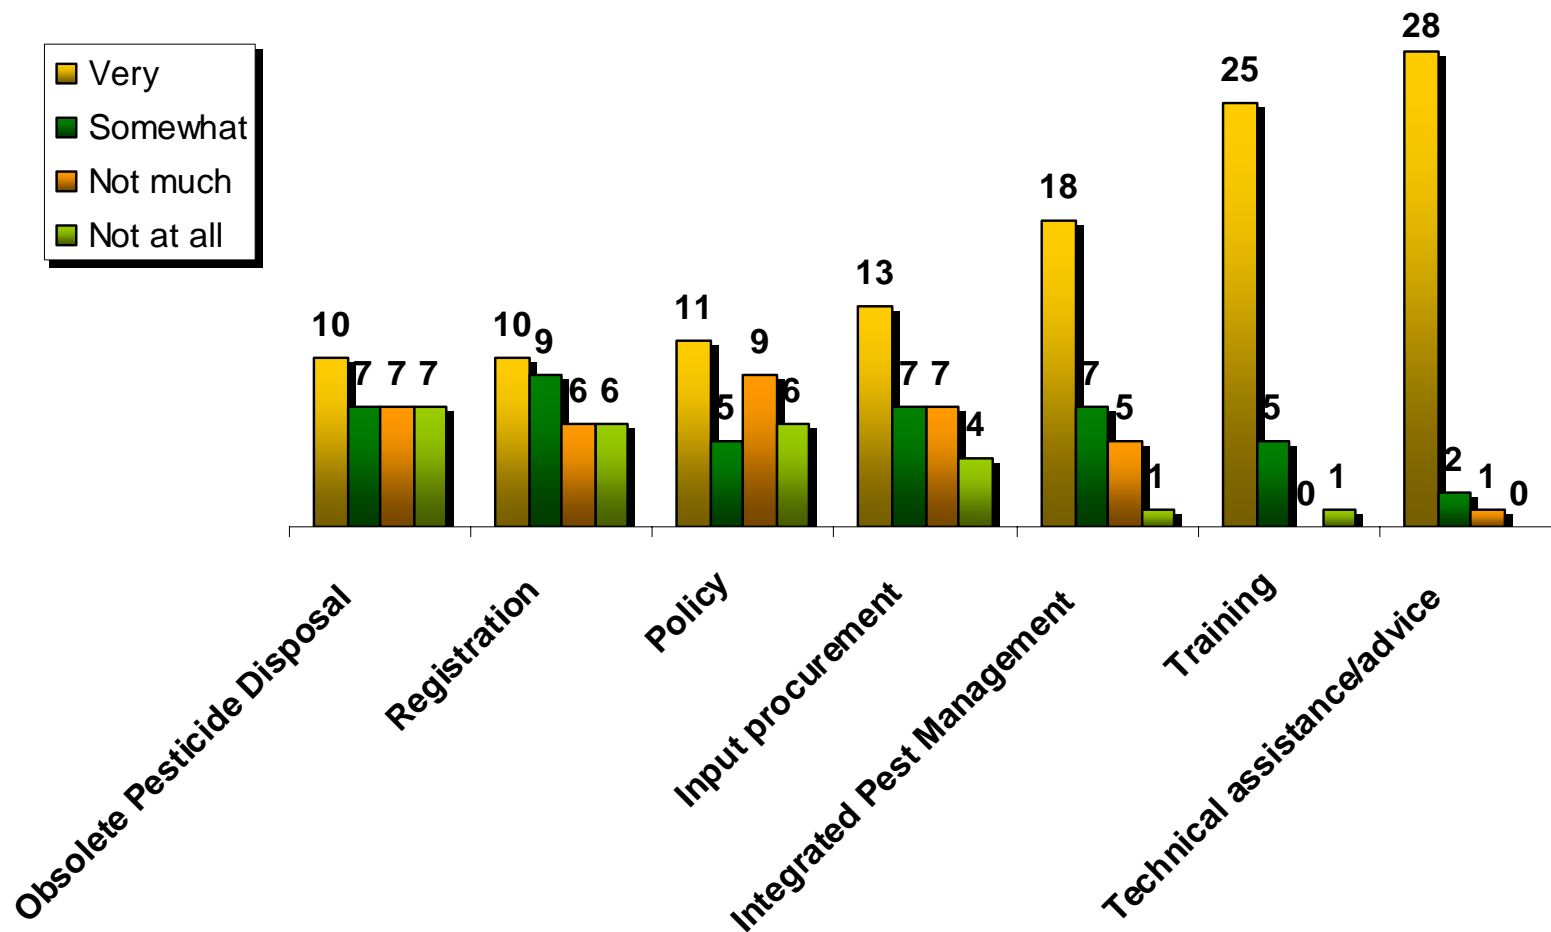

What you told us | Principal areas of interest

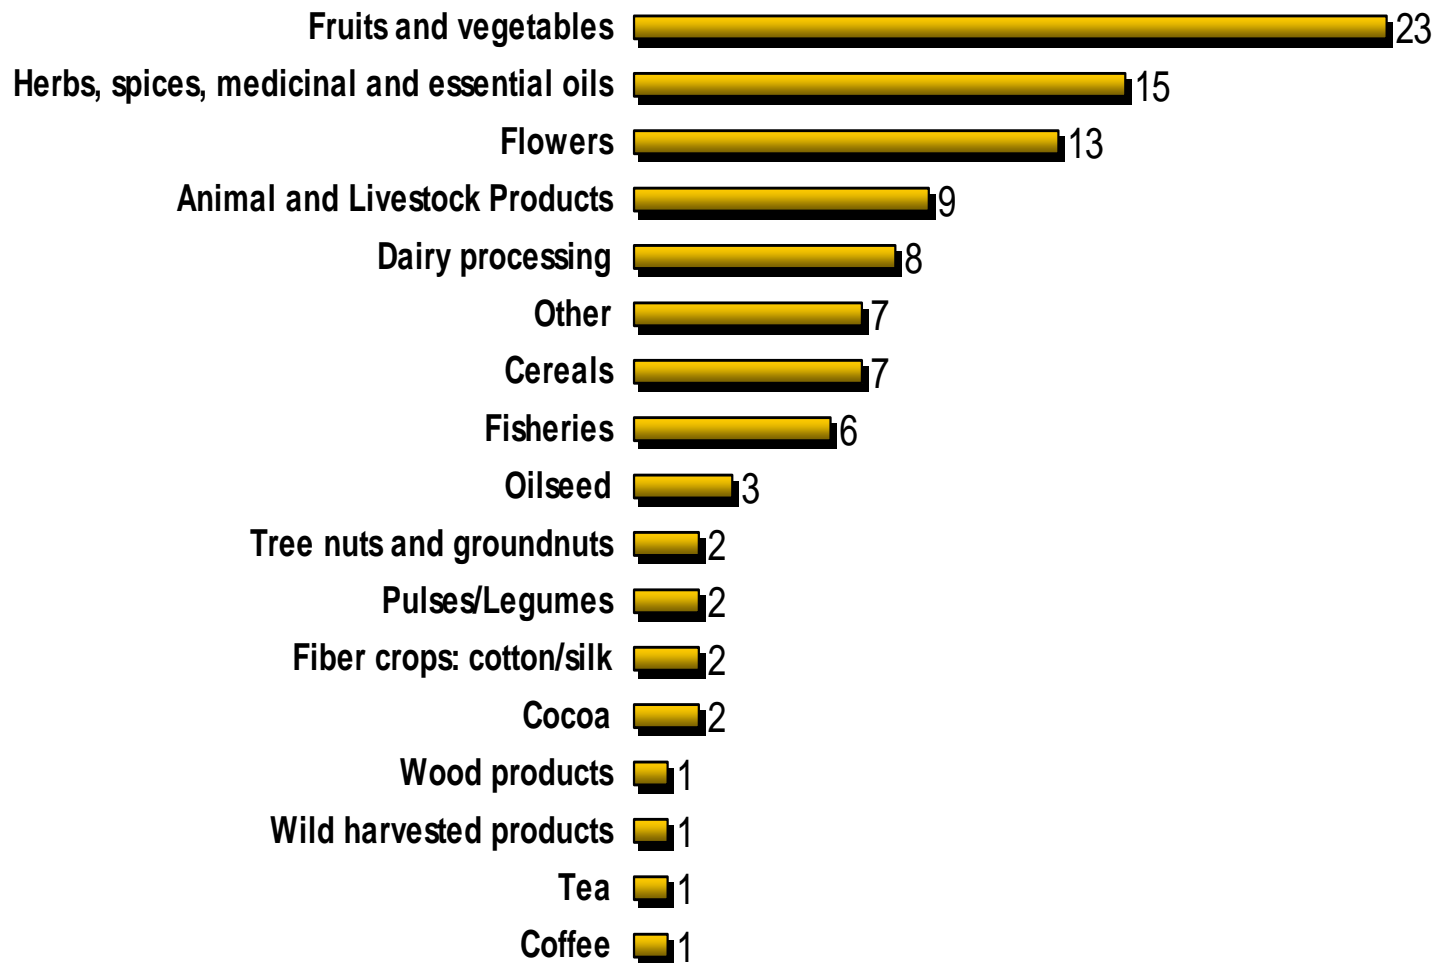

What you told us | Agrifood markets

What you told us | Intervention Support

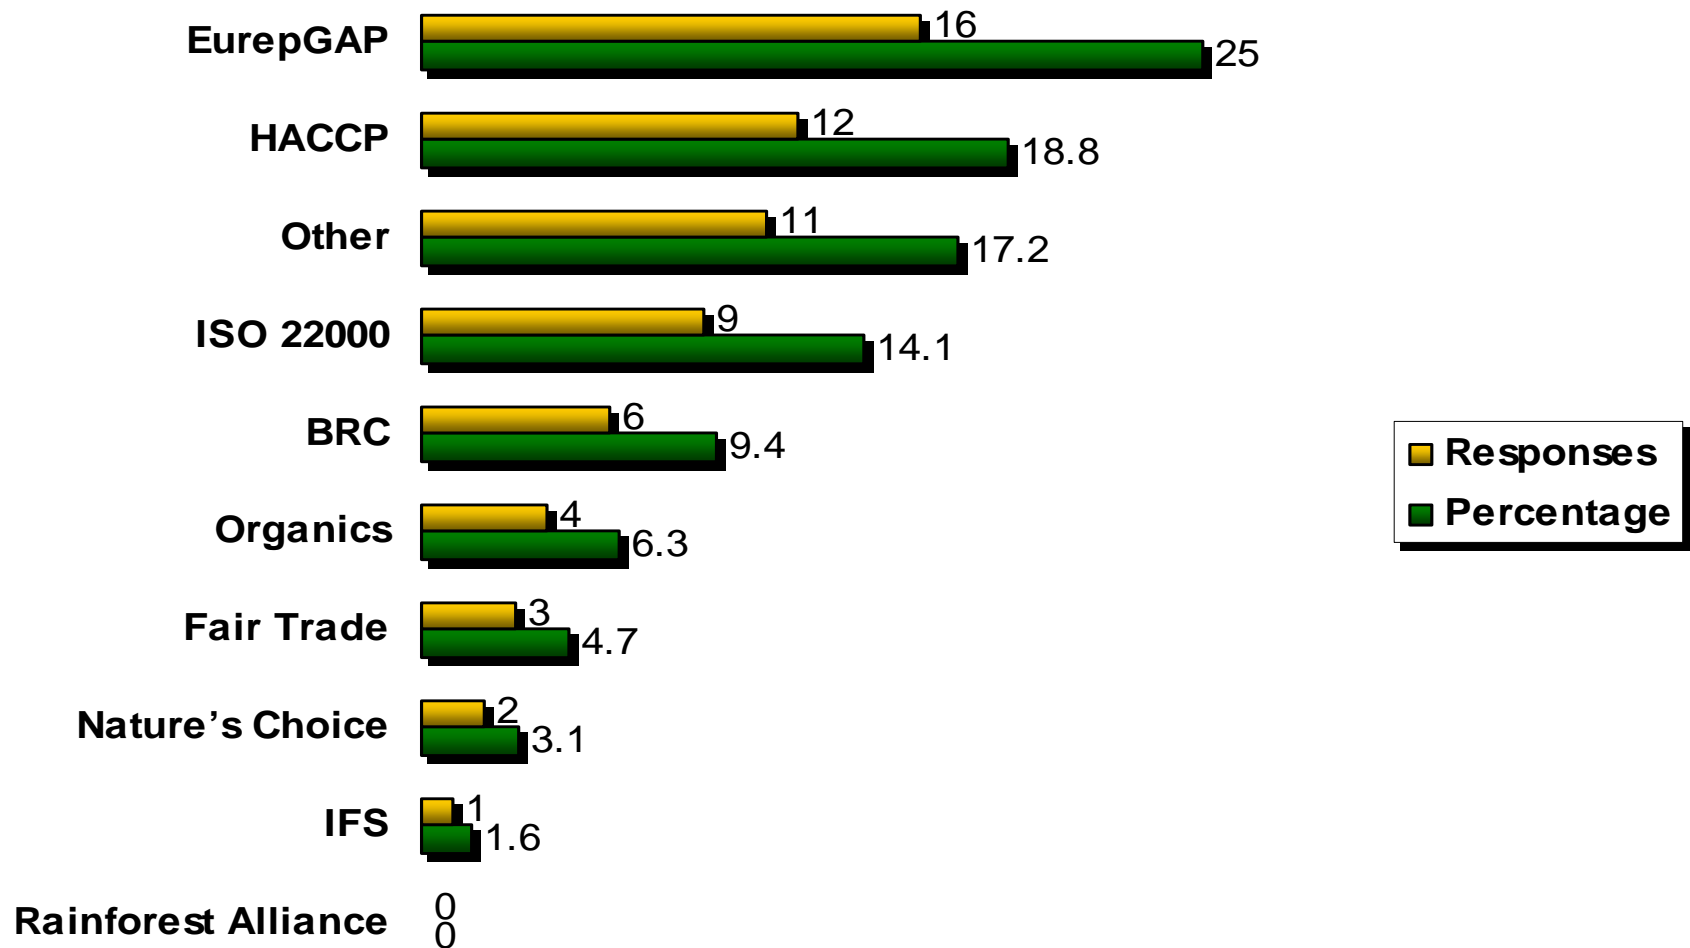

What you told us | Production Trends

■ Responses

What you told us | Voluntary Standards

Expectations Icebreaker

- What do you need from this course to help you do your job better?
- What expertise do you bring to this group that share with others?
- What has been your biggest pesticide challenge?
- What has been your biggest food safety challenge?
